WORK EXPERIENCE

MindMade Technologies

Flutter Developer | April 2024 - present

- Reduced average app load time by 35% through systematic code refactoring, lazy loading, and widget tree optimization.
- Implemented BLoC and Provider state management patterns, improving code maintainability and reducing crash rates by 40%.
- Led integration of RESTful APIs and Firebase services enabling real-time data sync.
- Mentored junior developers on Flutter best practices, code reviews, and Git workflows.

Primated Development Solution Pvt Ltd

Flutter Developer | November 2022 - March 2024

- Integrated RESTful APIs and Firebase backend services, enabling seamless data synchronization across platforms.
- Collaborated with product managers and designers to translate business requirements into detailed technical specifications.
- Implemented Hive and SQLite for offline-first functionality, ensuring app usability in low-connectivity environments.
- Designed and developed innovative UI/UX interfaces for 4 customer-facing Flutter applications.

Techeva IT Solution Private Limited

Trainee ios Developer • May 2022 - November 2022

- Developed native iOS features using Swift, enhancing core app functionality and user experience.
- Successfully published iOS applications to the App Store, complying with all Apple App Store Review Guidelines.
- Assisted in cross-platform testing and QA to ensure consistent performance across multiple iOS device sizes.
